DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-61, 124, 153-154, 161, drawn to a first method of treatment and a combination requiring an integrin antagonist, a matrix metalloproteinase inhibitor and an antineoplastic agent.

Group II, claim(s) 62-122, 155-156, drawn to a second method of treatment requiring radiation, an integrin antagonist, a matrix metalloproteinase inhibitor and an antineoplastic agent.

Group III, claim(s) 123, 125-152, 157, 160, drawn to a third method of treatment and a combination requiring an integrin antagonist and a matrix metalloproteinase inhibitor.

Group IV, claim(s) 158, drawn to a fourth method of treatment requiring an integrin antagonist, a matrix metalloproteinase inhibitor and an antineoplastic agent.

Group V, claim(s) 159, 162, drawn to a fifth method of treatment requiring radiation, an integrin antagonist and a matrix metalloproteinase inhibitor.

Art Unit: 1614

The inventions listed as Groups I-V do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the special technical features required for each group are different.

Furthermore, this application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

A specie of integrin antagonist, a specie of matrix metalloproteinase inhibitor and a specie of antineoplastic agent

Applicant is required, in reply to this action, to elect a single species of each of integrin antagonist, matrix metalloproteinase inhibitor and antineoplastic agent to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Art Unit: 1614

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: the structure of the compounds in each species is different and lacks a common core.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
